

Fellow Iranians,

The Islamic Republic has become a source of shame for us all. Iran is no longer seen as the successor of a proud 7000 year civilization, but as a 3rd world rogue state.

Iranian civilization is slowly being replaced with Arab customs and language. Our history and culture, the very sources of our pride, are being sold to the highest bidder.

Everyday, the world is bombarded with images of bearded fanatics shouting death to America, burning flags, and rallying support for terrorists. They see veiled women stoned to death. They see poverty, ignorance and ruin. This is not a third world nation. This is Iran.

Yet this is not the true face of Iran. Despite our great individual achievements in every field, few can separate an Iranian from Islamic extremists. For many, the word Iran and Iranian bring to mind the hijab, the Axis of Evil and terrorist organizations.

As long as the Islamic dictatorship in Iran continues to exist, we will be second-class citizens, no matter where we live. Only we can change this image and save our country.

The Iran of Tomorrow movement is a dynamic, massive and modern train, powered, and organized by Iranian technocrat volunteers worldwide. This movement is determined to remove the Islamic Republic and lead Iran towards a democratically elected government as well as a modern and prosperous economy.

IOTM's staff and volunteers are well organized and well equipped with a systematic approach, commonly used in corporate and governmental boardrooms to overcome obstacles in the path of freeing Iran.

The operational ranks of this movement have a clear vision of how to replace the Islamic Republic, how the transitional government should be formed, and how a referendum should be held in a free Iran under the supervision of international monitors.

This movement is on a powerful track and there is nothing that can stop it from bringing hope, Prosperity and respect to Iran in the 21st century.

**The Iran of Tomorrow Movement
needs you to join its ranks.**

We need you to take a stand and support a movement sorely needed for our country. We need you to volunteer if you have the time, form a cell to donate and support the movement if you have the resources and help develop and maintain an organization, which has suddenly become the largest opposition group against this regime.

**Your country needs you!
Join the movement!**
