

**Iran of Tomorrow Movement (IOTM)** is a Not-for-Profit multidimensional organization with active volunteer members across the globe. The organizational aspect of this movement is undertaken by a number of technocrats who have experience in world-class corporate boardrooms, Fortune 500 companies and leading institutions. These technocrats are highly successful individuals who have worked as leaders of their communities. Now at the peak of their success, they have undertaken the challenge and responsibility of removing the roots of international terrorism by fighting for the rights, respect, culture and identity of Iran.

Dr. Iman Foroutan is the CEO of Opus One Corporation. He is a graduate of U.C. in Electrical Engineering. Dr. Foroutan specializes in pattern recognition, process improvement and re-engineering, and design of complex online applications. He has 22 years of professional experience. Dr. Foroutan is the Executive Director of IOTM.

## OUR VISION

We have a clear vision on how to **eliminate the roots of terrorism worldwide**, how to remove IRI, how the transitional government should be formed, and how a referendum should be held in a free Iran under the supervision of international monitors.

## OUR MISSION

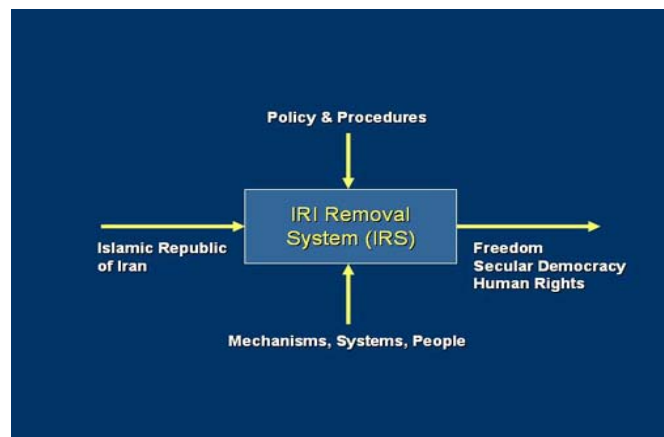

To support the people of Iran for the removal of the Islamic Republic in Iran and the establishment of Freedom, Human Rights, and a democratic, secular, and modern government in Iran.

## OUR APPROACH

In IOTM we use a systematic approach in our grass root efforts to achieve our goals. This includes careful identification of goals and milestones, detailed analysis of requirements, transparent definition and control of rules and guidelines, and identification and efficient use of appropriate human, technological, and monetary resources.

Ms. Homa Ehsan is a pioneer journalist and the first female Iranian reporter and television personality. She is a graduate of School of Journalism in Heidelberg, Germany and NU in Iran.
