

## **IOTM Statement Regarding Referendum in Iran**

1. **I**ran of Tomorrow Movement Believes in holding a Referendum in Iran as a way of determining the Nation's future, through a new Constitution based on separation of religion and State and in accordance with International Charter of Human Rights, as the basis of a Secular Society. We believe such Referendum to be the undeniable right of the Iranian Nation.
2. **I**n defense of our National Rights, we will dearly and firmly give our supporting hand to all efforts in preparation of the right atmosphere and prerequisites necessary for holding a True Democratic Referendum in Iran. (In fact, The IOTM Referendum Team have already studied and published detailed guidelines for organizing a free and healthy Referendum in Iran, available to the public.)
3. **I**n order to prevent any delineation from the righteous path of Democracy, establishment of the People's governance and involvement on their affairs, and in keeping with IOTM Mission, we reserve our right to continuously monitor, analyze and offer our critiques on the issue of Referendum. We will do so, with full regards for the Rights and interests of no one but the Nation of Iran, as they struggle towards establishment of an elected, nationalist, secular system of governance to replace IRI.
4. **T**he right time for a true democratic Referendum to replace the current Regime with a Democratic System of the People's choosing, will be at hand once the prerequisites are met. A true democratic atmosphere of peace and political freedom, education and campaigning is no doubt required, yet not achievable in presence and under the influence of the present dictatorial regime in Iran.

**The More Power to the People of Iran**
